

Don't be fooled.

Have you heard...?

- That Mass. Ave. is being “**narrowed**”?
It's not—and the new design handles traffic as well or better than the status quo
- That **emergency vehicles** will be blocked?
No, and the Police and Fire Chiefs both support the changes
- That we'll **lose parking**?
The plan keeps almost all existing legal parking spaces and creates some new ones
- That we should **send the money** for this project to Washington?
If we pass on the funding it will go to another Massachusetts community
- That the redesign is primarily to **benefit bicyclists**?
All users will benefit, but the biggest changes promote pedestrian safety
- That the project is **optional**?
That's wrong—the street needs to be rebuilt, according to the Town DPW Department
